

Krutarth Haldankar

Software Engineer

Goa, India | iamkrutarth1234@gmail.com | +91 9975538650 | krutarth-dev.vercel.app

Summary

Software Engineer with 2+ years of experience building production web applications across React, Angular, TypeScript, and Node.js. Experienced in modernizing legacy systems, PostgreSQL, and authentication flows including OAuth and JWT.

Work Experience

Goa Electronics Limited

Feb 2026 – Present

Software Developer

- Built React features for citizen-facing government services, translating legacy application behavior and requirements into modernized frontend workflows.
- Analyzed legacy specs and live application behavior to catch validation and workflow discrepancies before implementation.
- Wrote PostgreSQL stored procedures for multi-join data retrieval, conditional business logic, and legacy-to-modern data migration.
- Implemented OAuth-based SSO – identity-provider redirect handling, token extraction, and session-token generation.

Ciklum

Jul 2024 – Oct 2025

Software Engineer

- Built a config-driven multi-step onboarding form reused across three flows – registration, sensor addition, sensor replacement – eliminating duplicate form components.
- Implemented global NgRx caching with encrypted localStorage persistence, cutting redundant API calls across route changes.
- Identified a bundle-size issue from a heavy charting library and implemented route-level lazy loading, meaningfully improving initial load time.

Technical Projects

Writing & Diagramming Workspace

React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Tiptap, Excalidraw

- Single-user document workspace combining a Tiptap rich-text editor with an embedded Excalidraw canvas, toggled per document.
- Implemented autosave with a debounced PATCH-delta endpoint and version-based optimistic concurrency control to prevent silent overwrites.
- Document version history system storing recent snapshots with automatic pruning, viewable in the UI.
- Built a full auth system from scratch – OTP email verification, JWT access/refresh tokens with silent refresh.

Skills

- **Languages:** JavaScript, TypeScript
- **Frontend:** React, Next.js, Angular, Tailwind CSS, ShadCN, Redux, React Query
- **Backend:** Node.js, Express.js, Prisma ORM, REST APIs
- **Databases:** PostgreSQL, MySQL
- **Tools:** Git, Docker (basics)

Education

Goa College of Engineering

Aug 2020 – Jul 2024

Bachelor of Engineering – Computer Engineering

CGPA: 7.8
